Advanced Analytics Dashboard & User Role Management

WE ARE PIPASA TECHNOLOGIS LLP

Pipasa Technologies LLP is a forward-thinking software development company specializing in innovative technological solutions for the healthcare sector. With a strong focus on digital transformation in hospitals and clinics, we are the creators of **DrCodez** a comprehensive, cloud-based Hospital Management Software designed to streamline clinical, administrative, and billing workflows. Our mission is to empower healthcare providers with secure, customizable, and user-friendly tools that enhance operational efficiency and deliver better patient care through intelligent automation and seamless data management.

WHY US?

Unmatched Customer Support

We offer round-the-clock support via phone, WhatsApp, and remote login ensuring your hospital runs smoothly without interruption.

Robust Data Security

Patient and hospital data is protected with enterprise-grade encryption, secure cloud storage with auto backups, and strict role-based access controls.

Highly Customizable Your Workflow

Whether you're a small clinic or a 100-bed hospital, our software adapts to your specialties, departments, and local needs.

Simple & Intuitive User Interface

Designed for doctors, nurses, and reception staff, minimal training required. Clean layouts and clear navigation ensure maximum productivity.

Seamless and automatic GST & Insurance Billing

100% GST-compliant OPD/IPD billing. ICD10 integration for Insurance claims.

Real-Time Insights & Reports

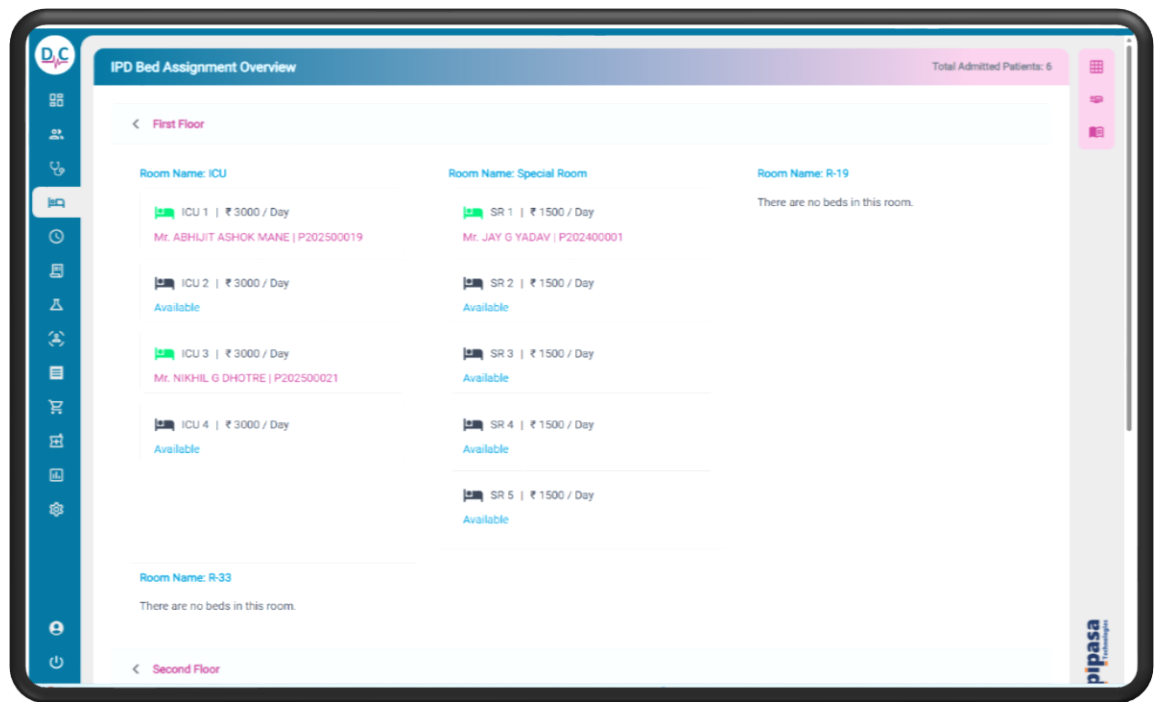

Track everything from daily revenue to patient trends with easy-to-use dashboards and exportable reports for audits, MIS, and NABH.

Robust, Intelligent Solutions Engineered for Modern Healthcare

At Pipasa Technologies, we're more than a software company, we're your technology partner. Whether it's a ready-to-deploy SaaS model or a tailor-made solution, our goal is to empower hospitals with intuitive, reliable, and future-ready systems.

We combine deep domain understanding with innovation, professional design, and a commitment to long-term support. Every solution we deliver reflects our belief in strong partnerships, continuous improvement, and putting your hospital's growth at the center of everything we do.

Why Settle for Standard When You Can Have a Solution Built Just for You?

CUSTOMIZED DrCodez SOFTWARE SOLUTIONS

Every hospital operates with its own unique workflows, compliance needs, and patient care protocols. Standard software often forces you to adapt to rigid processes—causing inefficiencies and frustration. If you've ever felt like *"this system doesn't fit us,"* it's time to explore our tailor-made solution.

At Pipasa Technologies, we build custom hospital management software around your exact needs—from department-specific workflows and billing to reporting and multi-location handling. Our expert team works closely with your staff to ensure seamless integration, modern design, and long-term scalability. Choose customization when precision, flexibility, and growth truly matter.

Advantages:

- Fully tailored to hospital-specific workflows and policies
- Long-term scalability with control over features and upgrades
- Better integration with existing internal systems, hardware if required (e.g., HRMS, PACS)

Limitations:

- Higher upfront development cost
- Longer implementation time
- Requires dedicated technical involvement from the hospital during initial phases
